PLUNGE POOL **PACKAGES**

At Plunge Pools Direct, we offer two equipment packages to meet various job requirements and budgets.

Economy Package: This package includes the essentials to get your pool up and running, without any extra features. It's a manual system, so you'll need to visit your local pool shop weekly with a water test and balance the water accordingly.

Gold Package: Our most popular option, this semi-automated system takes care of sanitising your pool and adjusting the pH levels. It requires less cleaning compared to other systems on the market, thanks to a larger energy efficient filtration pump and bigger cartridge filter. With this package, you only need to visit your local pool shop monthly with a water sample and balance the water as needed.

PUMP	CTX280 1HP Single Speed Pump	Viron P320XT Variable Speed Pump
